#FUELINGRECOVERY

According to the Center for Disease Control novel coronavirus (SARS-CoV-2) is spread from person to person via respiratory droplets and by contact with infected surfaces. Cleaning surfaces with a disinfectant is a best practice measure for the prevention of COVID-19 and other viral respiratory illnesses in community settings.

Jaguar Fueling is known best for its fast and efficient delivery of emergency and non-emergency fueling; however, to meet the rising demand, we have tooled up our ability to deliver high-quality virucide from Grenadier™ Plus and bulk delivery of hand sanitizer.

While practical measures are in place to deal with the current crisis we also would like to let you know that our thoughts and prayers are with all Americans as we fight against the spread of COVID-19.
